

The screenshot shows a web browser window with the address bar displaying `localhost:8081/recruiter/my-jobs`. The page title is "My Job Posts" and it features a table with columns: Title, Designation, Experience, Skills, and Actions. The table content displays "Failed to load jobs." Below the table, a DevTools console is open, showing a JavaScript error on line 81, column 28: `await fetch("/api/job/my-posts")`. The error message is "Uncaught (in promise) Error: Request failed with status code 401". The console also shows the "What's new in DevTools 138" notification.

## Whitelabel Error Page

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Jul 18 08:45:49 IST 2025

There was an unexpected error (type=Forbidden, status=403).

## Forbidden

The screenshot shows the Chrome DevTools Network tab. The top toolbar includes icons for back, forward, and other navigation functions, along with tabs for Elements, Console, Sources, and Network. The Network tab is active, displaying a list of requests. The first request, 'notifications', is highlighted in red, indicating a 403 status. The details pane for this request is visible, showing the status as 403, the type as 'document', and the initiator as 'Other'. The size of the response is 0.7 kB, and the time taken is 30 ms. The bottom status bar shows '1 request', '652 B transferred', '295 B resources', 'Finish: 30 ms', and 'DOMContentLoaded: 76 ms'.

1 requests	652 B transferred	295 B resources	Finish: 30 ms	DOMContentLoaded: 76 ms
